# CROPCADET™

CropCadet™ is the ultimate direct drill seeding machine is designed to meet the needs of farmers seeking flexibility and durability. Perfectly suited for 200-250 HP tractors, it offers a high underframe for better residue and trash flow through the machine, ensuring optimal performance.

It features an optional pull mount or rear trailing air seeding system, allowing farmers to choose the configuration that best suits their operation. With a narrow transport width of 3.5 meters, the machine is ideal for narrow roads, gates, and small paddocks. This compact size also eliminates the need for escort vehicles during road transport, making it more convenient for farmers on the move.

Additionally, the machine can be fitted with coulters and harrows, offering greater customisation options to meet the specific needs of individual farming operations. Whether for tough Australian conditions or varied farming requirements, this seeding machine provides the versatility and durability that farmers need to achieve the best results.

## Benefits

- Ideal for direct drill or conventional farming operations
- No escort needed for road transport
- Suitable for small paddocks
